* Manage and secure your fleet and workforce!

ENJOY POCKET-SIZE AND LIGHT-WEIGHT!

Extrack HandHeld Tracker is a handheld terminal with GSM and GPS connectivity, which is able to get device coordinates and transfer them via GSM network. No installation is required. This device is perfectly suitable for applications where location acquirement of remote objects is needed and perfectly suites for securing company's assets. Small size, long lifetime, mobility and universal configuration of the device ensures wide spectrum of its application: from people tracking, track control to special or secret tasks. GeoFence function allows to set restricted goegraphic areas and device will send warning messages whenever the object crosses the zone (in or out). Device can be used as USB GSM modem. High GPS receiver sensitivity makes device easy to integrate in any environment where ordinary GPS receivers can not fix their position. The whole of the mentioned advantages makes this solution very attractive for companies which success depends on quality of transportation, logistics and movable object monitoring.
